CONTENTS OF VOLUME 20

Number 1

BIOLOGICAL METHODS

R. H. M. Cross — 1 — A reliable epoxy resin mixture and its application in routine biological transmission electron microscopy

IMAGE ANALYSIS

I. Kerckaert, A. Claeys, W. Just, A. Cornelis and F. Roels — 9 — Automated image analysis of rat liver peroxisomes after treatment with thyroid hormones: changes in number, size and catalase reaction

E. Rahamim and M. Kessel — 19 — Image analysis of the cuticular corneal facet in *Anopheles gambia*

G. Rosati, F. Verni and P. Gualtieri — 27 — Computer-assisted reconstruction of the mating pairs of *Aspidisca* (Protozoa, Ciliophora)

SCANNING ELECTRON MICROSCOPY

D. Jones, W. J. McHardy, M. J. Wilson and G. I. Cooper — 33 — Scanning electron microscopy of calcium-rich crystals in *Frankia* root nodules of *Alnus glutinosa* saplings

PROCEEDINGS OF THE SYMPOSIUM ON DIAGNOSTIC ELECTRON MICROSCOPY IN THE PATHOLOGY OF LIVER AND KIDNEY, HELD AT THE FRENCH–BELGIAN CONGRESS ON ELECTRON MICROSCOPY, 17–20 MAY 1988, VILLENEUVE D'ASCQ, LILLE

N. Buyssens — 37 — The contribution of electron microscopy to the clinical diagnosis in kidney diseases

K. P. Dingemans and M. A. van den Bergh Weerman — 41 — Rapid EM diagnosis in cases of Reye's syndrome and alpha-1-antitrypsin deficiency

C. Jardon-Jeghers, M. Vivario, J. M. Rakic, N. Remacle and J. Boniver — 45 — Contribution of electron microscopy to the pathological diagnosis in routine liver biopsies

D. Nonclercq, G. Toubeau, G. Laurent, P. M. Tulkens and J. A. Heuson-Stiennon — 51 — Nephrotoxic injury and renal tissue repair associated with the administration of the anticancer drugs cisplatin and carboplatin

F. Van Hoof and F. Roels — 59 — Liver ultrastructure and diagnosis of inborn metabolic disorders

M. M. Praet and J. R. Quatacker — 63 — An ultrastructural analysis of cholestatic liver cell injury

67 — New Patents

71 — Diary

73 Meetings and Conference Announcements

I Instructions to Authors

Number 2

BIOLOGICAL APPLICATIONS

J. A. CHAPMAN and M. TZAPHLIDOU — 75 A study of staining for electron microscopy using collagen as a model system—VIII. Simulation of the negative staining pattern

G. PAPACCIO, V. ESPOSITO and V. MEZZOGIORNO — 89 Recovery of pancreatic B cells after Cyclosporin *A* treatment in Bio Breeding and Wistar rats

INSTRUMENTATION

P. GUALTIERI and P. COLTELLI — 99 A digital microscope for real time detection of moving microorganisms

Short Communication

P. GUALTIERI, V. PASSARELLI and L. BARSANTI — 107 A simple instrument to perform '*in vivo*' absorption spectra of pigmented cellular organelles

ABSTRACTS OF THE ANNUAL MEETING OF THE BELGIAN SOCIETY OF ELECTRON MICROSCOPY — 111

W. BIERMANS, M. DE BIE, I. BERNAERT, A. BAKKER and W. JACOB — 113 Localisation of mitochondrial creatine kinase: a survey

W. BIERMANS, I. BERNAERT, M. DE BIE, A. BAKKER and W. JACOB — 115 The correlation between energic state, contact site formation and creatine kinase activity in heart mitochondria: a cytochemical and morphometric study

W. BIERMANS, M. DE BIE, I. BERNAERT, A. BAKKER and W. JACOB — 117 Ultrastructural localisation of carnitine acetyltransferase activity in mitochondria of rat myocardium

PH. COMPERE, M. L. LHOAS and G. GOFFINET — 119 Light and electron microscopical localization of structural lipids with Sudan Black B and osmium tetroxide

C. CUVELIER, J. QUATACKER, H. MIELANTS, M. DE VOS, E. VEYS and H. ROELS — 121 Lymphoepithelial interactions in human terminal ileum and colon: electron-microscopic findings in normal and inflamed mucosa

D. DE CRAEMER, F. RICKAERT, R. J. A. WANDERS and F. ROELS — 125 Hepatic peroxisomes are smaller in primary hyperoxaluria type I (PH I). (Cytochemistry and morphometry)

M. J. HEYNEN, F. S. SYMONS and R. L. VERWILGHEN — 127 A method to visualize the results of morphometric analysis of electron microscopic blood cell sections

L. LEURENTOP and J.-P. VERBELEN — 131 The use of LX resin for the localization of phytochrome

F. Sanderson, R. Thibaut-Vercruyssen and M. F. Ronveaux-Dupal — 133 A light and electron microscopic study of the blebbing phenomenon appearing during an oxidative stress: its relation with cytoskeleton

R. Valcke and S. Beinsberger — 135 Cellular ultrastructure of T–DNA–ipt transformed calli

A. De Veirman and J. Van Landuyt — 137 The formation of buried layers by high-dose ion-implantation in Si: a TEM study

C. Fanidis, D. Van Dyck and J. Van Landuyt — 139 Dynamical electron diffraction and high resolution imaging from crystals with thermally moving atoms

T. Kaneyama, M. Naruse and Y. Ishida — 141 Development of 200 kV ultrahigh-resolution analytical electron microscope

S. Kuypers, J. Van Landuyt and S. Amelinckx — 143 Incommensurate misfit layer compounds of the type "MTS_3" (M = Sn, Pb, Bi, R.E.; T = Nb, Ta)

M. Op de Beeck, D. Van Dyck and J. Van Landuyt — 145 On the direct structure determination of amorphous objects

M. T. Otten and M. J. C. de Jong — 147 The CM20/STEM: a new 200 kV Scanning Transmission Electron Microscope

T. S. Shi, J. Reyes-Gasga, C. Fanidis, S. Amelinckx, J. Van Landuyt and G. Van Tendeloo — 149 Models for the $2\sqrt{2}a_0 \times 2\sqrt{2}a_0$ superstructure in $YBa_2Cu_3O_x$

A. Romano, J. Vanhellemont, J. R. Morante and W. Vandervorst — 151 TEM techniques for two dimensional junction delineation in integrated circuits

D. Schryvers and L. E. Tanner — 153 The influence of a nano-scale stress region on the austenite–martensite transformation in Ni–Al as observed by CEM and HREM

J. Van Puymbroeck, P. Van Espen and W. Jacob — 155 Acquisition and analysis of electron energy-loss spectra

M. Verwerft and G. Van Tendeloo — 157 Real space modulation in $Tl_2Ba_2CuO_6$ superconductor derived from electron diffraction information

159 Book Reviews

161 New Patents

175 Diary

177 Meetings and Conference Announcements

I Instructions to Authors

Number 3/4

ELECTRON OPTICS

K. Kanaya, Y. Yamamoto, M. Ogasawara, N. Baba and K. Yonehara — 179 An automatic focusing and astigmatism correction method for high resolution electron microscopy

IMAGE ANALYSIS

A. A. VALOIS, D. DWARTE and W. S. WEBSTER — 193 Image enhancement of brain autoradiographs using a TN-8500 image analysis system

BIOLOGICAL APPLICATIONS

G. BEDINGFIELD, H. BAILLIE-JOHNSON and I. GIBSON — 199 Cell surface changes in a cell line derived from a human pleural effusion

K. INOMATA, F. NASU and K. TOMIYASU — 207 Ultracytochemical localization of membrane-bound enzymes in the node of Ranvier

S. KIRKEBY, D. MOE, P. JAKOBSEN, P. RØMERT and M. E. MATTHIESSEN — 217 Polymeric aldehyde preparations: their chemistry and fixation capacity

J. R. HARRIS and A. HOLZENBURG — 223 Transmission electron microscopic studies on the quaternary structure of human erythrocyte catalase

D. P. MATTHOPOULOS and M. TZAPHLIDOU — 239 Tissue culture fixation with diimidoesters—III. Influence of adipimidate on cell size, thermal and mechanical stability

SCANNING ELECTRON MICROSCOPE APPLICATIONS

G. A. BONWICK, D. M. WITCOMB, S. WINSTANLEY and D. H. DAVIES — 247 Scale surface micro-structures of British freshwater Cyprinidae

MATERIALS SCIENCE AND METALLURGICAL APPLICATIONS

LIU QING, MENG QING-CHANG and HONG BANDE — 255 Calculation of tilt angles for crystal specimen orientation adjustment using double-tilt and tilt-rotate holders

Short Communication

LIU QING — 261 An equation to determine the practical tilt angle of a double-tilt specimen holder and its application to transmission electron microscopy

265 New Patents

275 Diary

i Volume Contents, Author and Subject Indexes for Volume 20 (1989)
